

Subject Index to Volume 31

A

A-4166 (hypoglycemic agent)

effects on ion channels in pancreatic β -cells, E185

Acetate infusion

effects on muscle pyruvate dehydrogenase activity and glucose-fatty acid cycle, E1007

Acetyl-coenzyme A

in muscle, effects of acetate infusion and exercise, E1007

Acetylcarnitine

in muscle, effects of acetate infusion and exercise, E1007

Acetylcholine

role in pancreatic enzyme secretion, E349

Acetylcholine receptors

role in glucose-induced pancreatic insulin release, E336

Acidosis

in chronic renal failure, effects on insulin actions in glucose and protein metabolism, E121

Adenohypophysis, *see* Pituitary gland

Adenoma cells

thyroid-stimulating hormone-secreting, somatostatin effects on, mechanisms, E558

Adenosine 3',5'-cyclic monophosphate

and cytokine release from glomerulosa cells, E114
regulation in pinealocytes, role of phosphatases, E458

Adenosine 5'-triphosphate

role in skeletal muscle proteolysis in cancer-associated cachexia, E996

Adenosine receptors

A₁, hyperactivity and phosphorylation-regulated coupling in Zucker rat adipocytes, E693

Adenylate cyclase-coupled receptors

somatostatin, in hamster glucagonoma cells, E40

Adenylyl cyclase

somatostatin-mediated activity, effects of proximal small bowel resection, E343

Adipocytes

catecholamine-induced lipolysis, mechanisms of regional variations, E1135
early change in insulin stimulation of phosphatidylinositol 3-kinase in obesity, E604
effects of GLUT-4 overexpression on glucose metabolism and fatty acid synthesis, E956

in obese Zucker rat, A₁ adenosine receptor hyperactivity and phosphorylation-regulated coupling, E693

Adipose tissue

brown, metabolic and antidiabetic effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678

brown and white, in suckling Zucker rats, and β -adrenoceptor agonist effects on obesity, E1039

calculation of mass, new hydration constant for body density and body water, E153

digoxin effects on fat oxidation rate, E1051

dose-response relations of dietary fat and body fat deposition, E546

exercise and lipoprotein lipase gene expression, E229

impaired postprandial triacylglycerol clearance in obesity, E588

Adiposity, *see* Obesity

Adrenal gland

see also Hypothalamic-pituitary-adrenal axis

glomerulosa cells

cytokine release and factors regulating, E114

growth responses to angiotensin II, E135

insulin effects on angiotensin II actions, E100

β -Adrenergic agonists

effects on myofibrillar gene expression, E858

β_2 , gender differences in growth response to clenbuterol, E1077

β -Adrenergic blockade

plus exercise, effects on amino acid metabolism, E910

α -Adrenergic mechanisms

role in inhibition of insulin-mediated glucose uptake in muscle, E305
role in muscle glucose metabolism in insulin-induced hypoglycemia, E248

Adrenergic receptors

and phosphatase role in regulation of pineal cAMP and cGMP, E458

β -Adrenergic receptors

role in catecholamine-induced lipolysis, E1135

β_2 , in skeletal muscle, effects of BRL-47672 (morpholine compound) on, E159

β_3 , metabolic and antidiabetic effects of agonist BRL-35135 in obese mice, E678

β -Adrenergic stimulation

effects on obesity development in suckling Zucker rats, E1039

role in muscle glucose metabolism in insulin-induced hypoglycemia, E248

Adrenocorticotrophic hormone

biological activity of precursors in adult vs. fetal adrenal cells, E623

effect on cytokine release from glomerulosa cells, E114

how many glucocorticoid-sensitive releasable pools, E85

secretion and clearance by fetal lung, E845

Age

effects on body composition, basal metabolic rate, thermogenesis, and protein turnover, E1083

Aging

caffeine effects on norepinephrine kinetics, fat oxidation, and energy expenditure, E1192

effects on diet restriction-induced changes in glucose metabolism, E941

effects on growth hormone actions in skeletal muscle glucose transport, E902

effects on insulin- vs. contraction-stimulated glucose transport, E1154

effects on protein synthesis in muscle and liver, E328

exercise-induced anabolism in older men, effects of added growth hormone, E268

myofibrillar protein synthesis reduction in, effects of resistance training on, E422

protein metabolism, effects of exercise and dietary protein level, E1143

waist-to-hip ratio and enhanced insulin sensitivity in older athletes, E484

L-Alanine

hepatic uptake in protein-deficient suckling rats, E368

Albumin

gene expression in hepatocytes, regulation by insulin, glucagon, and dexamethasone, E6

Aldosterone

angiotensin II-induced synthesis in glomerulosa cells, insulin effects on, E100

Alkaline phosphatase

intestinal, appearance and secretion in parallel with surfactant-like particles, E1205

Amino acids

blood levels, and effects of local epinephrine infusion on muscle metabolism, E55

branched-chain, α -ketoisocaproic acid hepatic metabolism in cirrhosis, E298

hepatic transport, in protein-deficient suckling rats, E368

kinetics

cortisol effects on, E501

exercise-induced acceleration, E514

metabolism, effects of exercise plus β -adrenergic blockade, E910

protein synthesis rate, measurement, in vivo 'flooding' method with minimal precursor pool activity assumptions, E735

in skeletal muscle, transmembrane transport and intracellular metabolism, E75

stimulation of insulin secretion, effects of incretins and cholecystokinin on, E949

γ -Aminobutyric acid_A receptor complex

and dehydroepiandrosterone effects on sleep, E107

Amrinone

effects on sepsis-induced muscle protein wasting, E491

Amylase

increased acinar content in genetically diabetic Otsuka Long-Evans Tokushima Fatty rat, E531

Anabolic drugs

BRL-47672 (morpholine compound), effects on skeletal muscle growth and β_2 -adrenoceptors, E159

Anaplerosis

method for calculating rate of chemical flux in heart, E397

Angiotensin II

aldosterone synthesis from, in glomerulosa cells, insulin effects on, E100
astroglial uptake of glucose from, pathway involved, E384
fetal vs. maternal pressor effects and clearance rate, E237
mitogenic, cell-cycle, and growth responses in adrenal glomerulosa cells, E135

Angiotensin receptors

AT₁, and angiotensin II-stimulated glucose uptake by astroglia, E384

Arachidonate metabolism

in angiotensin II-induced aldosterone synthesis, insulin effects on, E100

Arachidonic acid

effects on lactotroph [Ca^{2+}]_i and prolactin release, E1215

Arginine

plasma kinetics and effects of dietary arginine levels, E360

Arginine vasopressin, see Vasopressin**Ascorbate**

osteoblastic uptake and steady-state levels, role of TGF- β and Na⁺-ascorbate cotransport, E565

Aspartate aminotransferase

rate of chemical flux catalyzed by, method for estimating, E397

Atherogenesis

and impaired postprandial adipose tissue triacylglycerol clearance in obesity, E588

Athletes

elderly, waist-to-hip ratio and enhanced insulin sensitivity, E484

Atrial natriuretic peptide

expression and secretion by cardiomyocytes, effects of 1,25-dihydroxyvitamin D₃, E1108
osmolality-stimulated secretion, role of calcium and sodium ions, E476
secretion by atrial myocytes, autocrine/paracrine autoregulation, E428

Atrial natriuretic peptide receptors

ANPR-A, role in cGMP production and ANP secretion, E428

Autonomic nervous system neuropeptides

role in immune system development and homeostasis, E168

B**Baroreceptor reflexes**

hyperglycemia-induced changes, glutathione effects on, E1167

Becker muscular dystrophy

prednisone effects on protein metabolism, E67

Bicarbonate

¹³C-labeled, use for measuring CO₂ production, E1123

Bile acids

metabolism, postnatal maturation, triiodothyronine effects, E889

Birth

corticosteroid effects on free vs. sulfonated catecholamines, in fetus vs. preterm newborn, E28

intrahypothalamic release of oxytocin and vasopressin, functional consequences and controversies (review), E537

Blood

hypercoagulation after hemorrhage, possible role of plasminogen activator inhibitor-1, E1065

Blood-brain barrier

permeability to glucose and ketone bodies during starvation, E1161

Blood flow

effects on muscle glucose uptake and metabolism during hypoglycemia, E248

hepatic, response to exercise, effects of liver transplant, E636

in muscle, metabolic effects of local epinephrine infusion, E55

to muscle, nutritive vs. nonnutritive, role in control of muscle metabolism (review), E797

Body composition

aging effects on, E1083
importance of body density and total body water in body fat estimates, E153

Body fat distribution

waist-to-hip ratio, and enhanced insulin sensitivity in master athletes, E484

Body mass index

relation to skeletal muscle fiber composition and insulin-induced glucose transport, E453

Bone

osteogenic response to mechanical stimulation, IGF-I mRNA expression, E318

osteopetrosis, mineral homeostasis in, E312

Bradykinin

effects on pancreatic insulin release, E1027

Brain

see also **Blood-brain barrier; Hypothalamic-pituitary-adrenal axis**
astroglia, glucose uptake, angiotensin II-stimulated, pathway involved, E384

hypothalamus

cold exposure and secretagogue-induced changes in serum prolactin and growth hormone, E758
serotonin depletion, effects on streptozotocin-induced diabetes, E839
supraoptic and paraventricular nuclei, vasopressin and oxytocin release in (review), E537

neuroactive steroids, dehydroepiandrosterone effects during sleep in humans, E107

nucleus raphe obscurus, role in pancreatic hormone secretion, E1128
pinealocytes, adenosine and guanosine 3',5'-cyclic monophosphates in, role of phosphatase in regulation, E458

BRL-35135 (β_3 -adrenergic agonist)

metabolic and antidiabetic effects in obese mice, E678

BRL-35135 (β -adrenoceptor agonist)

effects on obesity development in suckling Zucker rats, E1039

BRL-47672 (morpholine compound)

effects on skeletal muscle growth and β_2 -adrenoceptors, E159

(R,S)-1,3-Butanediol acetoacetate esters

as potential nutrients, metabolism in pigs, E660

C**C-peptide**

kinetics of peripheral concentrations, use for study of pancreatic β -cell function, E21

Cachexia

cancer-associated, muscle proteolysis in, role of ATP-ubiquitin-proteasome pathway, E996

Caffeine

effects on norepinephrine kinetics, fat oxidation, and energy expenditure in elderly, E1192

Calcitonin gene-related peptide

and dehydroepiandrosterone, effects on thymocyte proliferation, E168

Calcium

circulating levels in osteopetrotic rat, E312

Calcium channels

in pancreatic β -cells, effects of hypoglycemic agent A-4166 on, E185
role in endothelin-3-induced vasopressin secretion, E467

Calcium currents

in somatotrophs, effects of growth hormone-releasing factor, E204

Calcium ion

see also **Hypercalcemia**

extracellular, role in glucose-induced pancreatic insulin release, E336
intracellular
in lactotrophs, effects of arachidonic acid, E1215
oscillations in [Ca^{2+}]_i, correlation with pulsatile insulin secretion, E282
role in somatostatin effects on thyroid-stimulating hormone-secreting cells, E558
role in osmolality-stimulated atrial natriuretic peptide secretion, E476

Cancer

cachexia from, muscle proteolysis in, role of ATP-ubiquitin-proteasome pathway, E996

Carbohydrate metabolism

effects of nocturnal rise in cortisol, E595
low-PO₂ stimulation, role of pancreatic hormones, E1174

Carbohydrates

oxidation, measuring by respiratory calorimetry vs. isotopic tracers, E789

Carbon dioxide

metabolic production, use of [¹³C]bicarbonate infusion for measuring, E1123

Cardiomyocytes

atrial, atrial natriuretic peptide secretion, autocrine/paracrine autoregulation, E428

- expression and secretion of atrial natriuretic peptide, effects of 1,25-dihydroxyvitamin D₃, E1108
- Cardiomyopathy**
diabetic, creatine kinase kinetics in, E1070
- Carnitine palmitoyltransferase II**
mRNA response to increased contractile activity, E277
- Castration**
effects on gender differences in growth response to clenbuterol, E1077
effects on pituitary levels of gonadotropin-releasing hormone in rat, E685
- Catecholamines**
free vs. sulfoconjugated, in fetus vs. preterm newborn, effects of corticosteroids, E28
lipolysis from, regional variations, mechanisms, E1135
role in muscle glucose metabolism in insulin-induced hypoglycemia, E248
- Cation channels**
role in endothelin-3-induced vasopressin secretion, E467
- Cell growth response**
in adrenal glomerulosa cells, from angiotensin II, E135
- Cell volume regulation**
osmolality-stimulated atrial natriuretic peptide secretion, role of calcium and sodium ions, E476
- Children**
energy expenditure, role of parental obesity, E917
- Chloroquine**
effects on muscle glucose and protein turnover, E820
- Cholecystokinin**
insensitivity in genetically diabetic Otsuka Long-Evans Tokushima Fatty rat, E531
role in pancreatic enzyme secretion, E349
- Cholecystokinin octapeptide**
effects on amino acid-induced insulin secretion, E949
- Cholesterol**
exercise effects in skeletal muscle vs. adipose tissue, E229
high-density-lipoprotein, and impaired postprandial adipose tissue triacylglycerol clearance in obesity, E588
- Cholinergic receptors**
role in glucose-induced pancreatic insulin release, E336
- Chromogranin C, see Secretogranin II**
- Circadian rhythms**
effects of nocturnal cortisol rise on carbohydrate and fat metabolism, E595
- Citrate**
in muscle, effects of acetate infusion and exercise, E1007
- Citric acid cycle**
method for calculating rate of chemical flux in heart, E397
- Citrulline**
plasma kinetics and effects of dietary arginine levels, E360
- Clenbuterol**
comparison with BRL-47672 (morpholine compound), E159
effects on muscle levels of bovine fast-twitch myosin light chain 1, E858
- sexual dimorphism in growth response, E1077
- Cold exposure**
effects on secretagogue-induced changes in serum prolactin and growth hormone, E758
- Collagen**
type I, mRNA expression after mechanical stimulation, E318
- Corticosteroids**
effects on free vs. sulfoconjugated catecholamines, in fetus vs. preterm newborn, E28
- Corticotrophs, see Pituitary gland, corticotrophs**
- Corticotropin-releasing hormone**
and ACTH release, effects of cortisol on, E85
in fetal hypothalamus, effects of stress and glucocorticoids, E1096
- Cortisol**
effects on energy expenditure and amino acid metabolism, E501
effects on fetal leucine kinetics and protein metabolism, E1114
effects on hypothalamic peptide-induced ACTH release, E85
levels in sleep, dehydroepiandrosterone effects on in humans, E107
nocturnal rise, effects on carbohydrate and fat metabolism, E595
plasma levels, interleukin-6 effects in humans, E813
response to ACTH, effects of ACTH precursors on, in adult vs. fetal adrenal cells, E623
- Creatine kinase**
kinetics in diabetic cardiomyopathy, E1070
- Cytochrome P-450**
side-chain cleavage enzyme, insulin up-regulation in glomerulosa cells, E100
- Cytokines**
metabolic effects during fed state and role of interleukin-1, E255
and osteogenic response to mechanical stimulation, E318
release from glomerulosa cells and factors regulating release, E114
- D**
- Dehydroepiandrosterone**
and calcitonin gene-related peptide, effects on thymocyte proliferation, E168
effects on sleep, electroencephalogram, and nocturnal hormones in humans, E107
- Development, see Growth; Maturation**
- Dexamethasone**
regulation of albumin gene expression in hepatocytes, E6
- Diabetes**
cardiomyopathy from, creatine kinase kinetics in, E1070
insulin-dependent, effects of nocturnal cortisol rise on carbohydrate and fat metabolism, E595
insulin-dependent and non-dependent, cholecystokinin insensitivity and amylase increase in genetically diabetic rat, E531
- metabolic and antidiabetic effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678
- non-insulin-dependent
relation of skeletal muscle fiber type to obesity and insulin-induced glucose transport, E453
succinic acid monomethyl ester protection from impaired B-cell response to glucose, E580
tolbutamide modulation of hepatic 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, E391
overexpression of GLUT-4, effects on glucose metabolism and fatty acid synthesis, E956
streptozotocin-induced
effects of brain serotonin depletion, E839
insulin resistance in, role of protein-tyrosine phosphatases, E932
type 1, estimated glucose utilization rate, E766
vascular complications, glutathione effects on hyperglycemia-induced hemodynamic changes, E1167
- Dietary components**
see also Nutrients
fat, dose-response relation to body fat deposition, E546
high-fat, effects on pyruvate dehydrogenase response to changes in plasma glucose and insulin, E752
protein level, effects on protein metabolism in elderly, E1143
protein restriction
during pregnancy, effects on insulin actions, E722
in renal failure, long-term adaptive changes in whole body protein turnover, E668
- Dietary deficiencies**
see also Malnutrition
diet restriction, long-term effects in non-human primates and changes with age, E941
protein, effects on hepatic amino acid transport in suckling rats, E368
selenium, and sulfation metabolism of thyroid hormones, E572
sodium, adrenal glomerulosa cell growth responses to angiotensin II, E135
- Digestive enzymes**
pancreatic, roles of somatostatin, acetylcholine, and cholecystokinin in regulation, E349
- Digoxin**
effects on energy expenditure and nutrient oxidation rate, E1051
- Diuresis**
pressure response, decrease in hyperthyroidism, role of renin-angiotensin system, E897
- DNA sequence elements**
and tissue-specific expression of lipoprotein lipase, E213
- Duchenne muscular dystrophy**
prednisone effects on protein metabolism, E67
- E**
- Eating, see Food intake**
- Electroencephalogram**
in sleep, dehydroepiandrosterone effects on in humans, E107

Endothelin receptors

ET_A, in myometrial cells, E825

Endothelins

ET-3, vasopressin secretion from, role of cation channels, E467

Endotoxin

metabolic changes from, effects of interleukin-1 receptor antagonist, E255

Endurance training, see Exercise training**Energy requirements**

gestational requirement calculations, importance of body density and body water in body fat estimates, E153

Energy expenditure

caffeine effects on, in elderly, E1192
in children, role of parental obesity, E917
cortisol effects on, E501
in cytokine- and endotoxin-treated rats, effects of interleukin-1 receptor antagonist, E255
digoxin effects on, E1051
interleukin-6 effects on, in humans, E813

Epinephrine

effect on muscle glycogenolysis during exercise, E127
effects of local infusion on muscle glucose and protein metabolism, E55
free vs. sulfoconjugated, in fetus vs. preterm newborn, effects of corticosteroids, E28

Epithelial cells

intestinal, regulation by TGF- β 1 vs. insulin, E1199

Estrous cycle

and secretogranin II release from adeno-hypophysial gonadotrope cells, E145

Exercise

effects of immobilization on skeletal muscle glucose transport and insulin receptors, E980
effects on glucose homeostasis and renin response after liver or kidney transplant, E636
effects on insulin-stimulated glucose uptake in low insulin responders, E1046
effects on lipoprotein lipase gene expression in skeletal muscle and adipose tissue, E229
effects on muscle amino acid and protein kinetics, E514
effects on muscle carnitine palmitoyltransferase II mRNA, E277
effects on muscle pyruvate dehydrogenase activity and glucose-fatty acid cycle after acetate infusion, E1007
effects on protein metabolism in elderly, E1143
muscle glycogenolysis during, role of epinephrine and of phosphorylase transformation, E127
plus β -adrenergic blockade, effects on amino acid metabolism, E910
plus growth hormone, effects on muscle in older men, E268

Exercise training

effects on hepatic glucose metabolism, role of gluconeogenesis vs. glycogenolysis, E375
effects on insulin sensitivity and body fat distribution, E484

effects on protein synthesis in muscle and liver, E328

effects on reduced myofibrillar protein synthesis in elderly, E422

F**Fasting**

see also **Food intake, after fasting**
effects on insulin secretion response to glucose, E21

Fat**body**

see also **Adipose tissue; Obesity**
metabolism, effects of nocturnal rise in cortisol, E595
oxidation, caffeine effects on, in elderly, E1192
dietary, dose-response relation to body fat deposition, E546

Fatty acids

free, kinetics and metabolism, interleukin-6 effects in humans, E813
intracellular metabolism, and pyruvate dehydrogenase response to changes in plasma glucose and insulin, E752
nonesterified
effects of low-protein diet during pregnancy on insulin actions, E722
plasma levels, effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678
oxidation, contractile activity effects on carnitine palmitoyltransferase II mRNA, E277
synthesis, effects of GLUT-4 overexpression, E956

Feedback mechanisms

and gonadotropin-releasing hormone levels in pituitary after orchidectomy in rat, E685

Fetus

angiotensin II pressor effects and clearance rate, vs. maternal rate, E237
biological activity of ACTH precursors in adrenal cells, E623
free vs. sulfoconjugated catecholamines, effects of corticosteroids, E28
hepatic glutamine-glutamate exchange with placenta, E705
hypothalamic corticotropin-releasing hormone and vasopressin, effects of stress and glucocorticoids, E1096
lung secretion and clearance of ACTH, E845
pituitary growth hormone expression, regulation by thyroid and glucocorticoid hormones, E262
protein metabolism, cortisol effects on, E1114
thyroid hormone metabolites, appearance in maternal urine, E33

Food intake

see also **Diet; Malnutrition; Nutrients**
after fasting, effects on insulin secretion response to glucose, E21
effects of interleukin-1 β , tumor necrosis factor- α , and both, E551
and host responses to cytokines or endotoxin, E255
postprandial thermogenesis, role of skeletal muscle vs. splanchnic tissue in men vs. women, E433

postprandial vs. postabsorptive state, effects on protein synthesis in muscle and liver, E328

Furan fatty acid

effects on pituitary uptake of thyroid hormones and release of thyroid-stimulating hormone, E974

Furin

role in parathyroid hormone-related peptide processing, E832

G**G protein-coupled receptors**

somatostatin, in hamster glucagonoma cells, E40

G proteins

and acinar-cell somatostatin receptor binding after enterectomy, E343
and endocrine abnormalities of obese Zucker rat, E693
role in somatostatin effects on thyroid-stimulating hormone-secreting cells, E558

GABA, see γ -Aminobutyric acid**Gastric inhibitory peptide**

effects on amino acid-induced insulin secretion, E949

Gender

growth hormone profiles in, neonatal phenobarbital-induced changes and effects on monooxygenase regulation, E439
and growth response to clenbuterol, E1077
role of skeletal muscle vs. splanchnic tissue in postprandial thermogenesis and oxygen consumption, E433

Genes

immediate early, hindlimb perfusion effects on expression in skeletal muscle, E866
promoters for lipoprotein lipase, DNA motifs and tissue-specific expression, E213
sequencing, myosin light chain 1, fast-twitch isoform from bovine muscle, E858

Genetics

codominant effects of fatty (*fa*) gene in fatty rat litters, E15

Gestation

see also **Placenta; Fetus**
energy requirement calculations, importance of body density and body water in body fat estimates, E153
fetal thyroid hormone metabolites in maternal urine, E33
maternal low-protein diet, effects on insulin actions, E722

Glomerulosa cells, see Adrenal gland, glomerulosa cells**Glucagon**

effects on hepatocytes from protein-deficient suckling rats, E368
hepatic gluconeogenic response, cold acclimation effects on, E1184
hepatic response to, effects of hepatic denervation, E194
and phosphorylation of hepatic 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, inhibition by tobutamide, E391
plasma levels, interleukin-6 effects in humans, E813

- regulation of albumin gene expression in hepatocytes, E6
- role in glucose homeostasis during malnutrition, E873
- role in low- PO_2 stimulation of glucose production, E1174
- role in sepsis-induced increased hepatic gluconeogenesis, E92
- secretion, somatostatin effects on, in hamster glucagonoma cells, E40
- Glucagon-like peptide I-(7-36)**
- vs. glucose-dependent insulinotropic polypeptide, comparative insulinotropic effects, E645
- Glucagon-like peptide I amide**
- effects on amino acid-induced insulin secretion, E949
- Glucocorticoids**
- effects on fetal hypothalamic corticotropin-releasing hormone and vasopressin, E1096
- effects on growth, and cortisol effects on fetal leucine kinetics and protein metabolism, E1114
- effects on hepatocytes from protein-deficient suckling rats, E368
- effects on hypothalamic peptide-induced ACTH release, E85
- muscle atrophy from, glutamine effects on, E730
- role in fetal pituitary growth hormone expression, E262
- Gluco kinase**
- role as glucosensor in β -cell mathematical model of glucose metabolism and insulin release, E775
- Gluconeogenesis**
- hepatic
- during exercise, effects of endurance training on, E375
- effects of denervation on hepatic response to glucagon, E194
- response to norepinephrine and glucagon, cold acclimation effects on, E1184
- role of glucagon in sepsis, E92
- in hepatocytes, mechanism of hypoxia-induced inhibition, E965
- from lactate, in fasting infants, E652
- and measuring glucose oxidation by respiratory calorimetry vs. isotopic tracers, E789
- in response to hypoglycemia, insulin effects on, E521
- Glucose**
- blood-brain barrier permeability during starvation, E1161
- deprivation, and B-cell non-response to glucose, protective effects of succinic acid monomethyl ester, E580
- disposal, effects of plasma insulin levels, E1031
- effectiveness, peripheral vs. hepatic, effects of insulin and glucose blood levels, E410
- homeostasis
- during exercise, after liver or kidney transplant, E636
- during malnutrition, roles of insulin vs. glucagon, E873
- effects of denervation on hepatic response to glucagon, E194
- in skeletal muscle, during insulin-induced hypoglycemia, E248
- zymosan-induced changes in, role of tumor necrosis factor, E219
- insulin effects on transport and extracellular distribution, E712
- and insulin secretion, dose-response relations in differing physiological states, E21
- insulin-stimulated conversion to glycogen, in working vs. nonworking heart, E48
- interconversion with lactate in fasting infants, E652
- kinetics
- in cytokine- and endotoxin-treated rats, effects of IL-1 receptor antagonist, E255
- simulation model and estimated glucose utilization rate in diabetics, E766
- kinetics and metabolism, interleukin-6 effects in humans, E813
- metabolism
- chloroquine effects on, in muscle, E820
- diet restriction-induced changes and effects of aging, E941
- effects of GLUT-4 overexpression, E956
- effects of local epinephrine infusion, E55
- effects of low-protein diet during pregnancy on insulin actions, E722
- hepatic, during exercise, effects of endurance training on, E375
- insulin-dependent, acidosis effects in chronic renal failure, E121
- and insulin release, in β -cell, mathematical model of glucokinase as glucosensor, E775
- mechanisms of magnesium deficiency effects, E925
- in sepsis, role of glucagon, E92
- oxidation, measuring by respiratory calorimetry vs. isotopic tracers, E789
- plasma levels
- see also **Hyperglycemia; Hypoglycemia**
- changes in, pyruvate dehydrogenase response to, effects of high-fat diet on, E752
- effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678
- production
- autoregulated hepatic, effects of lactate infusion in traumatic stress, E630
- low- PO_2 -stimulated, role of pancreatic hormones, E1174
- stimulation of insulin release, bradykinin effects on, E1027
- threshold effects on insulinotropic activities of incretins, E645
- transport in muscle
- effects of immobilization on, E980
- growth hormone effects on and changes with age, E902
- insulin-stimulated, relation to skeletal muscle fiber type and obesity, E453
- insulin-stimulated vs. contraction-stimulated, maturation effects on, E1154
- uptake
- by astroglia, role of angiotensin II and pathway involved, E384
- glucose-mediated, effects of plasma insulin level, E1089
- insulin-stimulated, in sedentary vs. endurance-trained low insulin responders, E1046
- by muscle, insulin-mediated, inhibition by α -adrenergic vascular effect, E305
- Glucose-6-phosphatase**
- plus phosphofructokinase, role in β -cell glucose-sensing, simulation analysis, E775
- Glucose-dependent insulinotropic polypeptide**
- natural vs. synthetic, vs. glucagon-like peptide I-(7-36), E645
- Glucose-fatty acid cycle**
- in skeletal muscle, effects of acetate infusion and exercise, E1007
- Glucose tolerance**
- in older athletes vs. sedentary persons, E484
- Glucose transporters**
- GLUT-1, role in angiotensin II-stimulated glucose uptake by astroglia, E384
- GLUT-1 and GLUT-4
- hindlimb perfusion effects on gene expression in skeletal muscle, E866
- in skeletal muscle, effect of immobilization on expression, E980
- in skeletal muscle, growth hormone effects on and changes with age, E902
- GLUT-4
- insulin-induced translocation to plasma membrane in skeletal muscle, E613
- overexpression, effects on glucose metabolism and fatty acid synthesis, E956

- Glutamate**
- and glutamine, exchange between placenta and fetal liver, E705
- Glutamine**
- effects on myosin heavy chain synthesis and muscle atrophy from glucocorticoids, E730
- and glutamate, exchange between placenta and fetal liver, E705
- Glutathione**
- effects on hyperglycemia-induced hemodynamic changes, E1167
- Glycogen**
- hepatic metabolism, role of glucagon in sepsis, E92
- insulin-stimulated synthesis, in working vs. nonworking heart, E48
- synthesis in skeletal muscle, effects of peroxyvanadium compounds, E60
- Glycogen phosphorylase**
- b to a transformation, role in muscle glycogenolysis during exercise, E127
- Glycogen synthase**
- activity in muscle, effects of plasma insulin levels, E1031
- Glycogenolysis**
- in exercising muscle, regulatory mechanisms, role of epinephrine and of phosphorylase transformation, E127
- hepatic, during exercise, effects of endurance training on, E375

Glycolysis

in β -cell, mathematical model of glucokinase as glucosensor, E775

Glycosylation

and effects of long-term diet restriction on glucose metabolism and changes with aging, E941

Gonadotrope cells

adenohypophyseal, secretogranin II release from, E145

Gonadotropin-releasing hormone

pituitary levels after orchidectomy in rat, E685
and secretogranin II release from adeno-hypophyseal gonadotrope cells, E145

Growth

fetal, cortisol effects on fetal leucine kinetics and protein metabolism, E1114
hepatic amino acid transport in protein-deficient suckling rats, E368
pancreatic, somatostatin actions in acinar cells after enterectomy, E343
skeletal muscle, effects of BRL-47672 (morpholine compound) on, E159

Growth hormone

effects on skeletal muscle glucose transport and changes with age, E902
expression in fetal pituitary, regulation by thyroid and glucocorticoid hormones, E262
levels in sleep, dehydroepiandrosterone effects on in humans, E107
lifelong overexposure to, effects on growth hormone binding and target organs, E745
plus resistance exercise, effects on muscle in older men, E268

secretion

age- and sex-specific patterns, neonatal phenobarbital-induced changes and effects on monooxygenases, E439
growth hormone-releasing factor-stimulated, role of Ca^{2+} influx, E204
serum levels, secretagogue-induced changes, effects of cold exposure on, E758

Growth hormone-binding protein

in transgenic mice expressing bovine growth hormone gene, E745

Growth hormone-releasing factor

effects on somatotroph Ca^{2+} influx, E204

Guanine nucleotides

effects on acinar-cell somatostatin receptor binding after enterectomy, E343

Guanosine 3',5'-cyclic monophosphate

effects on atrial natriuretic peptide secretion by atrial myocytes, E428
regulation in pinealocytes, role of phosphatases, E458

Guanosine 5'-triphosphate-binding protein, see G proteins**H****Heart**

see also **Cardiomyocytes**
insulin-stimulated glycogen synthesis, effect of myocardial work history, E48
method for calculating rate of chemical flux through citric acid cycle, E397
nonworking abdominal heterograft, E48

Hemodynamics

hyperglycemia-induced changes, glutathione effects on, E1167

Hemorrhage

hypercoagulation from, and effects on plasminogen activator inhibitor-1, E1065

Hepatic nerves

sympathetic, role in exercise-induced rise in hepatic glucose production, E636

Hepatocytes

albumin gene expression, regulation by insulin, glucagon, and dexamethasone, E6
amino acid transport in, effects of protein malnutrition, E368
gluconeogenesis in, mechanism of hypoxia-induced inhibition, E965
periportal and perivenous, effects of cold acclimation on gluconeogenic response to norepinephrine and glucagon, E1184
tolbutamide-inhibited phosphorylation of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, E391

Hexose

deprivation, and B-cell non-response to glucose, protective effects of succinic acid monomethyl ester, E580

Hormones

in muscle metabolism, control by local vasomodulation (review), E797
pro sequence removal, furin role in parathyroid hormone-related peptide processing, E832

Hydrocortisone

effects on free vs. sulfoconjugated catecholamines, in fetus vs. preterm newborn, E28

R- β -Hydroxypentanoate

metabolism and toleration after R-1,3-pentenediol infusion, E446

Hypercalcemia

malignancy-associated, furin role in parathyroid hormone-related peptide processing, E832

Hyperglucagonemia

in infections, role in increased gluconeogenesis, E92

Hyperglycemia

glucose uptake during, effects of plasma insulin level, E1089
hemodynamic changes from, glutathione effects on, E1167

Hypertension

insulin resistance in, and α -adrenergic inhibition of glucose uptake in muscle, E305

Hyperthyroidism

reduced pressure diuresis and natriuresis response, role of renin-angiotensin system, E897

Hyperuricemia

insulin effect on uric acid excretion in humans, E1

Hypoaminoacidemia

and effects of local epinephrine infusion on muscle metabolism, E55

Hypoglycemia

gluconeogenic counterregulatory response, insulin effects on, E521
insulin-induced, muscle glucose uptake and metabolism, E248

Hypoglycemic agents

A-4166, effects on ion channels in pancreatic β -cells, E185

Hypothalamic peptides

and ACTH release, effects of cortisol on, E85

Hypothalamic-pituitary-adrenal axis

effects of interleukin-1 β , tumor necrosis factor- α , and both, E551
fetal, effects of stress and glucocorticoids, E1096

Hypothalamic-pituitary-gonadal axis

and gonadotropin-releasing hormone levels in pituitary after orchidectomy in rat, E685

Hypothermia

and ambient temperature effects on secretagogue-induced changes in prolactin and growth hormone levels, E758

Hypoxemia

fetal, effects on hypothalamic corticotropin-releasing hormone and vasopressin, E1096

Hypoxia

mechanism of gluconeogenesis inhibition in hepatocytes, E965

I**Incretins**

effects on amino acid-induced insulin secretion, E949
natural vs. synthetic, human vs. porcine, comparative insulinotropic effects, E645

Indoxyl sulfate

effects on pituitary uptake of thyroid hormones and release of thyroid-stimulating hormone, E974

Infants

see also **Newborn**
interconversion of plasma lactate and glucose during fasting, E652
maturation of bile acid metabolism, triiodothyronine effects on, E889

Infection, see Sepsis**Inflammatory response**

zymosan-induced, effects on glucose and insulin, E219

Insulin

see also **Insulin resistance; Insulin response; Insulin sensitivity**
actions during pregnancy, low-protein diet effects on, E722
as cause of skeletal muscle glucose transporter GLUT-4 translocation to plasma membrane, E613
and cortisol effects on energy expenditure and protein metabolism, E501
effects on angiotensin II actions in glomerulosa cells, E100
effects on counterregulatory response to hypoglycemia, E521
effects on glucose transport and extracellular distribution, E712
effects on hepatocytes from protein-deficient suckling rats, E368
effects on uric acid and sodium excretion in humans, E1
in glucose and protein metabolism, changes in chronic renal failure, role of acidosis, E121
glucose transport stimulation by, growth hormone effects on and changes with age, E902

- glucose uptake stimulation by, in sedentary vs. endurance-trained low insulin responders, E1046
- mimetic effects of peroxyvanadium compounds in vivo, E60
- muscle tissue sensitivity to small increments, E248
- myocardial responsiveness, in working vs. nonworking heart, E48
- plasma levels
- changes in, pyruvate dehydrogenase response to, effects of high-fat diet on, E752
 - effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678
 - effects on glucose-mediated glucose uptake, E1089
 - effects on muscle glucose disposal and glycogen synthase activity, E1031
 - postprandial rise, role of interleukin-1, E255
- regulation of albumin gene expression in hepatocytes, E6
- release from pancreas, bradykinin effects on, E1027
- role in low- P_{O_2} stimulation of glucose production, E1174
- role in magnesium deficiency effects on glucose metabolism, E925
- secretion
- amino acid-induced, effects of incretins and cholecystokinin on, E949
 - comparative effects of glucagon-like peptide-I-(7-36), vs. glucose-dependent insulinotropic polypeptide, E645
 - glucose-induced pancreatic, role of cholinergic receptors, E336
 - glucose-stimulated release, impairment by hexose lack or starvation, protection by succinic acid monomethyl ester, E580
 - mechanism of stimulation by hypoglycemic drug A-4166, E185
 - pulsatile, correlation with $[Ca^{2+}]_i$ oscillations, E282
 - stimulus-secretion coupling, mathematical model of glucokinase as glucosensor in β -cell glucose metabolism, E775
- secretion rate, effects of differing physiological states, E21
- signaling in skeletal muscle, effects of contraction on, E987
- vs. glucagon, roles in glucose homeostasis during malnutrition, E873

Lipopolysaccharide, see Endotoxin**Lipoprotein lipase**

gene expression, exercise effects in skeletal muscle vs. adipose tissue, E229
murine gene promoter, DNA motifs and tissue-specific expression, E213

Lipoproteins

triacylglycerol-rich, postprandial clearance in adipose tissue, impairment in obesity, E588
and triiodothyronine effects on maturation of bile acid metabolism, E889

12-Lipoxygenase pathway

in angiotensin II-induced aldosterone synthesis, insulin effects on, E100

Liver*see also* **Hepatocytes**

amino acid transport, in protein-deficient suckling rats, E368
blood flow, response to exercise, effects of liver transplant, E636
cirrhosis, metabolism of α -ketoisocaproic acid, E298
denervation, effects on response to glucagon, E194
effects of selenium deficiency on tissue type I 5'-monodeiodinase, E572
in fetus, glutamine-glutamate exchange with placenta, E705
glucagon role in sepsis-induced increased gluconeogenesis, E92
gluconeogenic response to norepinephrine and glucagon, cold acclimation effects on, E1184
glucose metabolism during exercise, effects of endurance training on, E375
glucose production
autoregulated, effects of traumatic stress, E630
exercise-induced rise, effects of liver or kidney transplant, E636
insulin sensitivity, role in magnesium deficiency effects on glucose metabolism, E925
monooxygenases, and effects of neonatal phenobarbital on growth hormone secretory patterns, E439
protein synthesis in, effects of age, nutritional state, and exercise, E328

Liver transplant

effects on glucose homeostasis during exercise, E636

Lung

secretion and clearance of ACTH, E845

Luteinizing hormone

postcastration increase, and gonadotropin-releasing hormone levels in pituitary after orchidectomy in rat, E685
and secretogranin II release from adeno-hypophysial gonadotrope cells, E145

Lycine

kinetics, effects of exercise plus β -adrenergic blockade, E910

M**Magnesium**

dietary deficiency, mechanisms of effects on glucose metabolism, E925

Malic enzyme

rate of chemical flux catalyzed by, method for estimating, E397

Malnutrition*see also* **Dietary deficiencies**

effects on glucose homeostasis, roles of insulin vs. glucagon, E873

Maturation

of bile acid metabolism, triiodothyronine effects on, E889
effects on insulin- vs. contraction-stimulated glucose transport, E1154
growth hormone profiles in, neonatal phenobarbital-induced changes and effects on monooxygenase regulation, E439

Membrane currents

in pancreatic β -cells, effects of hypoglycemic agent A-4166 on, E185

Memory

and dehydroepiandrosterone effects on sleep, E107

Metabolic rate

aging effects on, E1083
cortisol effects on, E501

Metabolism

[13 C]bicarbonate infusion for measuring CO₂ production, E1123

Methodologies

doubly labeled water analyses, deuterium isotope ratios, least-squares curve fitting of NMR data, E1018
for estimating in vivo glucose transport in small animals, tracer technique, E712
for genotyping rats segregating fatty (*fa*) gene, molecular genetics method, E15
for measuring carbohydrate oxidation, respiratory calorimetry vs. isotopic tracers, E789
for measuring CO₂ production, [13 C]bicarbonate infusion, E1123
for measuring gestational energy costs and body composition, new hydration constant for body density and body water, E153
for measuring muscle amino acid transmembrane exchange and intracellular metabolism, E75
for measuring protein synthesis rate in vivo, flooding method with minimal precursor pool activity assumptions, E735
for measuring rate of chemical flux through citric acid cycle in heart, E397
for measuring whole body protein synthesis, 13 CO₂ vs. plasma precursor techniques, E174
for study of muscle metabolism, vasoconstrictor effects in perfused vs. incubated preparations (review), E797
for study of pancreatic β -cell function, use of C-peptide kinetics, E21
hindlimb perfusion
effects on gene expression in skeletal muscle, E866
vs. isolated incubated muscle, local vasomodulation effects on metabolism (review), E797
lactate and pyruvate plasma and tissue isotopic enrichment values, problems with use, E880
nitrogen balance vs. whole body amino acid kinetics, E668

3-O-Methylglucose

insulin effects on transport and extracellular distribution, E712

Microsomes

hepatic monooxygenases and effects of neonatal phenobarbital on growth hormone secretory patterns, E439

Mineral homeostasis

in osteopetrotic rat, E312

Mitochondria

fatty acid oxidation, exercise effects on muscle carnitine palmitoyltransferase II mRNA, E277

Modeling in physiology

β -cell glucose metabolism and insulin release, glucokinase as glucosensor, E775
simulation model for glucose kinetics and estimated glucose utilization rate in diabetics, E766

Models

for pancreatic A cells, hamster glucagonoma cells, somatostatin effects in, E40
for studying myocardial metabolism, nonworking abdominal heterograft heart, E48
for studying physiologic basis of genetic dominance, E15
genetically diabetic Otsuka Long-Evans Tokushima Fatty rat with cholecystokinin insensitivity, E531
obese Zucker rat, adipocyte A₁ adenosine receptors, hyperactivity and phosphorylation-regulated coupling, E693
rat hindlimb perfusion, effects on gene expression in skeletal muscle, E866
streptozotocin-induced diabetes, effects of brain serotonin depletion, E839

5'-Monodeiodinase

tissue type I: liver, kidney, and thyroid levels in selenium deficiency, E572

Monooxygenases

hepatic, and effects of neonatal phenobarbital on growth hormone secretory patterns, E439

Morphine

stimulation of prolactin and growth hormone secretion, ambient temperature effects, E758

Morpholine compounds

BRL-47672, effects on skeletal muscle growth and β_2 -adrenoceptors, E159

Multiple organ failure

zymosan-induced, role of tumor necrosis factor, E219

Muscarinic receptors

M₂ and M₁ subtypes, presence in rat pancreatic islets, E336

Muscle, heart, see Myocardium; Cardiomyocytes**Muscle, skeletal**

amino acid and protein kinetics after exercise, E514
amino acid transmembrane transport and intracellular metabolism, E75
atrophy from glucocorticoids, glutamine effects on, E730
bovine fast-twitch myosin light chain 1, gene cloning and muscle levels after clenbuterol, E858
BRL-47672 (morpholine compound) effects on growth and β_2 -adrenoceptors, E159

chloroquine effects on glucose and protein turnover, E820
 contraction
 effects on carnitine palmitoyltransferase II mRNA, E277
 effects on insulin signaling, E987
 early change in insulin stimulation of phosphatidylinositol 3-kinase in obesity, E604
 exercise-induced anabolism, effects of added growth hormone in older men, E268
 exercise-induced lipoprotein lipase gene expression, E229
 fiber types, relation to obesity and insulin-induced glucose transport, E453
 glucose disposal and glycogen synthase activity, role of plasma insulin levels, E1031
 glucose transport in, growth hormone effects on and changes with age, E902
 glucose uptake and metabolism during hypoglycemia, E248
 glycogenolysis during exercise, role of epinephrine, E127
 hindlimb perfusion, effects on gene expression, E866
 immobilization, effects on glucose transport and insulin receptors, E980
 insulin-induced glucose transporter GLUT-4 translocation to plasma membrane, E613
 insulin-like effects of peroxyvanadium compounds, E60
 insulin-mediated glucose uptake, inhibition by α -adrenergic vascular effect, E305
 maturation effects on insulin- vs. contraction-stimulated glucose transport, E1154
 mechanically stimulated growth and protein turnover, E288
 metabolism
 control by local vasomodulation (review), E797
 effects of local epinephrine infusion, E55
 myofibrillar protein synthesis, reduction in elderly, effects of resistance training on, E422
 Na⁺-K⁺ transport, effects of insulin-like growth factor I, E849
 prednisone effects on protein metabolism in Duchenne and Becker muscular dystrophy, E67
 protein synthesis in, effects of age, nutritional state, and exercise, E328
 proteolytic pathways involved in cancer-associated cachexia, E996
 pyruvate dehydrogenase activity and glucose-fatty acid cycle, effects of acetate infusion and exercise, E1007
 role in postprandial thermogenesis and oxygen consumption, in men vs. women, E433
 sepsis-induced catabolism, amrinone effects on, E491
Muscle, smooth
 uterine, type A endothelin receptors in myometrial cells, E825
 vascular, angiotensin II effects and clearance rate, fetal vs. maternal, E237

Muscular dystrophy

Duchenne and Becker forms, prednisone effect on protein metabolism, E67

Myocardium

working vs. nonworking, responsiveness to insulin, E48

Myocytes

see also **Cardiomyocytes**
 amino acid transmembrane transport and intracellular metabolism, E75

Myosin heavy chain

synthesis, glutamine effects on, E730

Myosin light chains

MLC-1, fast-twitch isoform, from bovine muscle, gene cloning and muscle levels after clenbuterol, E858

N

Neonates, see Newborn

Neurons

in glucose regulation, effects of hepatic denervation on hepatic response to glucagon, E194

Neuropeptides

autonomic, role in immune system development and homeostasis, E168

Neurosteroids

role in immune system development and homeostasis, E168

Newborn

see also **Infants**

free vs. sulfoconjugated catecholamines, effects of corticosteroids, E28
 phenobarbital exposure, effects on age- and sex-specific growth hormone profiles regulating monooxygenases, E439

Nicotinic receptors

role in glucose-induced pancreatic insulin release, E336

Nitric oxide

synthesis, effects of dietary arginine levels, E360

Nitrogen

metabolism
 α -ketoisocaproic acid hepatic metabolism in cirrhosis, E298
 protein malnutrition and hepatic amino acid transport in suckling rats, E368
 urinary excretion, measuring whole body protein synthesis via ¹³CO₂ vs. plasma precursor techniques, E174

Nitrogen balance

in renal failure, long-term adaptation to very low protein diet, E668

Norepinephrine

free vs. sulfoconjugated, in fetus vs. preterm newborn, effects of corticosteroids, E28
 hepatic gluconeogenic response, cold acclimation effects on, E1184
 kinetics, caffeine effects on, in elderly, E1192
 plasma levels, interleukin-6 effects in humans, E813

Nutrients

see also **Diet; Food intake**

ketone body precursors as potential nutrients, metabolism in pigs, E660
 oxidation rate, digoxin effects on, E1051

Obesity

A₁ adenosine receptor hyperactivity and phosphorylation-regulated coupling in Zucker rat adipocytes, E693
 codominant effects of fatty (*fa*) gene in fatty rat litters, E15
 development in suckling Zucker rats, β -adrenoceptor agonist effects on, E1039
 dose-response relations of dietary fat and body fat deposition, E546
 early changes in phosphatidylinositol 3-kinase activation in muscle and adipocytes, E604
 impaired postprandial triacylglycerol clearance in adipose tissue, E588
 metabolic and antidiabetic effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678
 overexpression of GLUT-4, effects on glucose metabolism and fatty acid synthesis, E956
 parental, and energy expenditure in children, E917
 postprandial thermogenesis and oxygen consumption, in men vs. women, role of skeletal muscle vs. splanchnic tissue, E433
 relation to skeletal muscle fiber composition and insulin-induced glucose transport, E453
 sodium pump and digoxin effects on energy expenditure and nutrient oxidation rate, E1051
 waist-to-hip ratio and enhanced insulin sensitivity in older athletes, E484

Orchidectomy

effects on pituitary levels of gonadotropin-releasing hormone in rat, E685

Ornithine

plasma kinetics and effects of dietary arginine levels, E360

Osmolality

atrial natriuretic peptide secretion from, role of calcium and sodium ions, E476

Osmoregulation

intrahypothalamic release of oxytocin and vasopressin, functional consequences and controversies (review), E537

Osteoblasts

ascorbate uptake and steady-state levels, role of TGF- β and Na⁺-ascorbate cotransport, E565

Osteocalcin

mRNA expression after mechanical stimulation, E318

Osteocytes

role in osteogenic response to mechanical stimulation, E318

Osteopetrotic rat

mineral homeostasis in, E312

Ovaries

granulosa cells, insulin-like growth factor binding protein-3 effects, E1057

Oxidation of substrates

use of [¹³C]bicarbonate infusion for measuring, E1123

Oxotremorine-m

effects on glucose-induced pancreatic insulin release, E336

Oxygen

- consumption, postprandial, role of skeletal muscle vs. splanchnic tissue in men vs. women, E433
- low- PO_2 -stimulated glucose production, role of pancreatic hormones, E1174

Oxytocin

- intrahypothalamic release, functional consequences and controversies (review), E537

P**Pancreas**

- A cells, somatostatin effects on, in hamster glucagonoma cells, E40
 - acinar cells, proliferation after enterectomy, role of somatostatin and adenyl cyclase, E343
 - acini, cholecystokinin insensitivity in genetically diabetic Otsuka Long-Evans Tokushima Fatty rat, E531
 - B-cells, starvation-impaired responsiveness to glucose, protective effects of succinic acid monomethyl ester, E580
 - β -cells
 - ion channels in, effects of hypoglycemic agent A-4166 on, E185
 - mathematical model of glucose metabolism and insulin release, glucokinase as glucosensor, E775
 - responsiveness to glucose in differing physiological states, E21

- adenohypophyseal gonadotrope cells, secretogranin II release from, E145
- corticotrophs, how many glucocorticoid-sensitive pools of releasable ACTH, E85
- gonadotropin-releasing hormone levels after orchidectomy in rat, E685
- growth hormone expression in fetus, regulation by thyroid and glucocorticoid hormones, E262
- lactotroph cells, arachidonic acid effects on $[Ca^{2+}]$, and prolactin release, E1215
- somatotroph cells, growth hormone-releasing factor-stimulated Ca^{2+} influx, E204
- uptake of thyroid hormones, effects of furan fatty acid and indoxyl sulfate, E974

Placenta

- angiotensin II pressor effects and clearance rate, vs. fetal rate, E237
- glutamine-glutamate exchange with fetal liver, E705

Plasminogen activator inhibitor-1

- elevation after hemorrhage, E1065

Postprandial metabolism

- impaired adipose tissue triacylglycerol clearance in obesity, E588

Potassium channels

- ATP-sensitive, in pancreatic β -cells, effects of hypoglycemic agent A-4166 on, E185
- calcium-activated, role in endothelin-3-induced vasopressin secretion, E467

Potassium currents

- inward-rectifying, role in somatostatin effects on thyroid-stimulating hormone-secreting cells, E558

Prednisone

- effects on muscle and whole body protein metabolism in Duchenne and Becker muscular dystrophy, E67

Pregnancy, see Gestation; Placenta; Fetus**Pressure diuresis and natriuresis response**

- decrease in hyperthyroidism, role of renin-angiotensin system, E897

Pro-opiomelanocortin

- effects on cortisol response to ACTH, in adult vs. fetal adrenal cells, E623

Proadrenocorticotrophic hormone

- effects on cortisol response to ACTH, in adult vs. fetal adrenal cells, E623

Proglucagon

- gene expression, somatostatin effects on, in hamster glucagonoma cells, E40

Prohormone processing

- furin role in parathyroid hormone-related peptide processing, E832

Prolactin

- release from lactotrophs, effects of arachidonic acid, E1215
- serum levels, secretagogue-induced changes, effects of cold exposure on, E758

Propionic acidemia

- urinary markers after R-1,3-pentanedial infusion, E446

Propionyl-CoA

- metabolism after R-1,3-pentanedial infusion, E446

Proteasomes

- role in skeletal muscle proteolysis in cancer-associated cachexia, E996

Protein kinases

- PKA (cAMP-dependent)
 - role in tolbutamide modulation of hepatic 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, E391

PKC

- effect on cytokine release from glomerulosa cells, E114
- role in angiotensin II-stimulated glucose uptake by astroglia, E384

Protein-tyrosine phosphatases

- role in insulin resistance of streptozotocin-induced diabetes, E932

Proteins

- degradation, in chronic renal failure, insulin-mediated changes and effects of acidosis, E121
- dietary, restriction during pregnancy, effects on insulin actions, E722
- dietary deficiency, effects on hepatic amino acid transport in suckling rats, E368
- metabolism
 - in cytokine- and endotoxin-treated rats, effects of interleukin-1 receptor antagonist, E255
 - effects of exercise and dietary protein intake in elderly, E1143
 - in fetus, cortisol effects on, E1114
 - in muscle, proteolytic effects of local epinephrine infusion, E55
 - prednisone effects in Duchenne and Becker muscular dystrophy, E67

in renal failure, long-term adaptation to very low protein diet, E668
in skeletal muscle, amino acid kinetics in, E75
Synthesis
glucocorticoid-induced decrease, glutamine effects on, E730
exercise-induced, effects of added growth hormone in older men, E268
in muscle and liver, effects of age, nutritional state, and exercise, E328
myofibrillar, reduction in elderly, effects of resistance training on, E422
sepsis-induced peptide-chain inhibition, amrinone effects on, E491
in vivo rate measurement, flooding method with minimal precursor pool activity assumptions, E735
whole body, measurement via $^{13}\text{CO}_2$ vs. plasma precursor techniques, E174
synthesis and breakdown, aging effects on, E1083
Turnover
cortisol effects on, E501
exercise-induced acceleration, E514
in skeletal muscle, response to mechanical stimuli, E288
Proteolysis, in muscle
chloroquine effects on, E820
Protooncogenes, see Genes, immediate early
Pyruvate
and lactate, plasma and tissue isotopic enrichment values, problems with use, E880
Pyruvate dehydrogenase
activity in muscle, effects of acetate infusion and exercise, E1007
Pyruvate dehydrogenase complex
response to changes in plasma glucose and insulin, effects of high-fat diet, E752

R

Rat obesity fatty (fa) gene
codominant effects in fatty rat litters, E15
Regulatory volume increase
osmolality-stimulated atrial natriuretic peptide secretion, role of calcium and sodium ions, E476
Renal failure, see Kidney failure, chronic
Renal nerves
sympathetic, role in renin response to exercise, E636
Renin
response to exercise, role of renal nerves and effects of kidney transplant, E636
Renin-angiotensin system
role in reduced pressure diuresis and natriuresis response in hyperthyroidism, E897
Resistance training, see Exercise
Reviews
intrahypothalamic release of oxytocin and vasopressin, functional consequences and controversies, E537
vascular and endocrine control of muscle metabolism, E797

S

Secretagogues
serum prolactin and growth hormone changes from, effects of cold exposure on, E758
Secretogranin II
release from adenohypophyseal gonadotrope cells, E145
Selenium
dietary deficiency, and sulfation metabolism of thyroid hormones, E572
Sepsis
glucagon role in sepsis-induced increased hepatic gluconeogenesis, E92
metabolic effects during fed state and role of interleukin-1, E255
muscle wasting from inhibition of peptide-chain initiation, amrinone effects on, E491
Serotonin
hypothalamic, effects of depletion on streptozotocin-induced diabetes, E859
SH-PTP2/syp, see Protein-tyrosine phosphatases
Skeletal muscle
in partitioning of glucose effectiveness and insulin sensitivity, E410
Sleep
dehydroepiandrosterone effects on in humans, E107
Sodium-ascorbate cotransport
role in osteoblastic ascorbate uptake, E565
Sodium-calcium exchange
role in osmolality-stimulated atrial natriuretic peptide secretion, E476
Sodium channels
and endothelin-3-induced vasopressin secretion, E467
Sodium-hydrogen exchange
and mechanism of osmolality-stimulated atrial natriuretic peptide secretion, E476
Sodium ion
dietary deficiency, adrenal glomerulosa cell growth responses to angiotensin II, E135
excretion
pressure response, decrease in hyperthyroidism, role of renin-angiotensin system, E897
relation to uric acid excretion in humans, E1
role in osmolality-stimulated atrial natriuretic peptide secretion, E476
Sodium-potassium-ATPase
and digoxin effects on energy expenditure and nutrient oxidation rate, E1051
Sodium-potassium-chloride cotransport
and mechanism of osmolality-stimulated atrial natriuretic peptide secretion, E476
Sodium-potassium transport
in skeletal muscle, effects of insulin-like growth factor I, E849
Sodium pump, see Sodium-potassium-ATPase
Somatostatin
effects on glucagon secretion, proglucagon gene expression, and cAMP generation, E40

effects on thyroid-stimulating hormone-secreting cells, mechanisms, E558
role in pancreatic enzyme secretion, E349
Somatostatin receptors
in hamster glucagonoma cells, functional characteristics, E40
in pancreatic acinar cells, effects of proximal small bowel resection, E343
Somatotroph cells, see under Pituitary
Somatotropin, see Growth hormone
Splanchnic tissues
role in postprandial thermogenesis and oxygen consumption, in men vs. women, E433
Starvation
effects on blood-brain barrier permeability to glucose and ketone bodies, E1161
impaired B-cell response to glucose, protective effects of succinic acid monomethyl ester, E580
Streptozotocin
diabetes from, effects of brain serotonin depletion, E839
Stress
hypoxemic, in fetus, effects on hypothalamic corticotropin-releasing hormone and vasopressin, E1096
metabolic, hyperglycemia from, effects on autoregulation of hepatic glucose production, E630
metabolic effects during fed state and role of interleukin-1, E255
Substrate oxidation
use of [^{13}C]bicarbonate infusion for measuring, E1123
Succinic acid monomethyl ester
protection against starvation-impaired pancreatic responsiveness to glucose, E580
Sulfated iodothyronines
production and metabolic clearance in selenium deficiency, E572
Sulfonylurea drugs
extrapancreatic action, tolbutamide modulation of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, E391
Surfactant-like particles
appearance and secretion in parallel with intestinal alkaline phosphatase, E1205
Sympathetic nerves
hepatic, role in exercise-induced rise in hepatic glucose production, E636
renal, role in renin response to exercise, E636

T

T cells
maturation in thymus, roles of dehydroepiandrosterone and calcitonin gene-related peptide in, E168
TCA cycle, see Citric acid cycle
Temperature
ambient
cold acclimation, effects on gluconeogenic response to norepinephrine and glucagon, E1184
effects on secretagogue-induced changes in serum prolactin and growth hormone, E758

Temperature (*continued*)

body, effects of interleukin-1 β , tumor necrosis factor- α , and both, E551
see also **Thermogenesis**

Testosterone

levels in sleep, dehydroepiandrosterone effects on in humans, E107

Thermogenesis

feeding-induced, aging effects on, E1083
postprandial, role of skeletal muscle vs. splanchnic tissue in men vs. women, E433

in suckling Zucker rats, and β -adrenoceptor agonist effects on obesity, E1039

Thermogenin, see **Uncoupling protein****Thymocytes**

mitogen-stimulated proliferation, effects of dehydroepiandrosterone and calcitonin gene-related peptide, E168

Thymus

roles of dehydroepiandrosterone and calcitonin gene-related peptide in thymocyte maturation, E168

Thyroid gland

effects of selenium deficiency on tissue type I 5'-monodeiodinase, E572

Thyroid hormones

see also **Hyperthyroidism**

role in fetal pituitary growth hormone expression, E262

sulfation of, in selenium deficiency, E572

sulfoconjugated metabolites in fetus, appearance in maternal urine, E33
triiodothyronine, effects on maturation of bile acid metabolism, E889

triiodothyronine and thyroxine, pituitary uptake, effects of furan fatty acid and indoxyl sulfate, E974

Thyroid-stimulating hormone

pituitary release, effects of furan fatty acid and indoxyl sulfate, E974
secretion, somatostatin effects on, mechanisms, E558

Thyrotropin-releasing hormone

and somatostatin effects on thyroid-stimulating hormone-secreting cells, E558

Tolbutamide

inhibition of glucagon-induced phosphorylation of 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase, E391

Total body water, see **Water****Transforming growth factor- β**

role in osteoblastic ascorbate uptake and steady-state levels, E565

Transforming growth factor- β 1

vs. insulin, regulation of insulin-like growth factor binding protein-2, E1199

Transgenic mice

with bovine growth hormone gene plus metallothionein-I or phosphoenolpyruvate carboxykinase gene, E745

Transplantation

autografts of transformed muscle, skeletal muscle response to mechanical stimuli, E288

of liver, effects of denervation on hepatic response to glucagon, E194

Transport

transmembrane, of skeletal muscle amino acids, E75

Trauma

hyperglycemia from, effects on autoregulation of hepatic glucose production, E630

Triacylglycerols

low-protein diet during pregnancy, effects on insulin actions, E722
postprandial clearance in adipose tissue, impairment in obesity, E588

Triglycerides

exercise effects in skeletal muscle vs. adipose tissue, E229

Tumor necrosis factor- α

alone and with IL-1 β , effects on hypothalamic-pituitary-adrenal axis, E551

metabolic effects during fed state, E255
release from glomerulosa cells and factors regulating release, E114

role in zymosan-induced changes in glucose and insulin, E219

Tumors

cachexia from, muscle proteolysis in, role of ATP-ubiquitin-proteasome pathway, E996

Tyrosine phosphoproteins

in skeletal muscle, effects of contraction on, E987

U

Ubiquitin

role in skeletal muscle proteolysis in cancer-associated cachexia, E996

Uncoupling protein

in brown adipose tissue, effects of β_3 -adrenergic agonist BRL-35135 in obese mice, E678

Urea cycle

intermediate metabolism in humans, E360

Uremia

furan fatty acid and indoxyl sulfate effects on pituitary uptake of thyroid hormones, E974

Uric acid

insulin effect on plasma levels and renal excretion in humans, E1

Urine

nitrogen excretion, measuring whole body protein synthesis via $^{13}\text{CO}_2$ vs. plasma precursor techniques, E174

Uterus

myometrial smooth muscle cells, type A endothelin receptors in, E825

V

Vagus nerve

medullary dorsal motor nucleus, and nucleus raphe obscurus role in pancreatic hormone secretion, E1128

Valine

incorporation into protein, rate measurement under 'flooding' conditions, E735

Vanadate, Vanadyl derivatives, see **Peroxyvanadium compounds****Vascular system**

muscle metabolism control by local vasomodulation (review), E797

Vasoconstrictors

site-specific, role in control of muscle metabolism (review), E797

Vasopressin

and ACTH release, effects of cortisol on, E85

endothelin-3-induced secretion, role of cation channels, E467

in fetal hypothalamus, effects of stress and glucocorticoids, E1096

intra-hypothalamic release, functional consequences and controversies (review), E537

Vitamin C, see **Ascorbate****Vitamin D, 1,25(OH) $_2$ D $_3$**

circulating levels in osteopetrotic rat, E312

effects on cardiomyocyte expression and secretion of atrial natriuretic peptide, E1108

W

Water

total body content, effects on energy requirement calculations, E153

Z

Zinc

plasma levels, postprandial decrease, role of interleukin-1, E255

Zona glomerulosa cells, see **Adrenal gland, glomerulosa cells****Zucker rat**

codominant effects of fatty (*fa*) gene in early development, E15

Zymosan

hormonal and metabolic changes from, role of tumor necrosis factor, E219
